The licensee proposes to construct upstream fish passage facilities on the east bank of the diversion dam and to modify the existing spillway to improve downstream passage. To accommodate the proposed modifications, the licensee would raise the project's normal maximum reservoir elevation by 6 feet and would replace the current flashboard system with a series of five inflatable weirs to attain the proposed higher reservoir elevation. The licensee states that the proposed changes are necessary to facilitate the reintroduction of steelhead trout (*Oncorhynchus mykiss*) and Chinook salmon (*Oncorhynchus tshawytscha*).
